

Heuristology and Experientiology:
By Shomit Sirohi

I. Phone and Experience

I have talked on the phone earlier, and it constitutes a law which is subjective knowledge of a lot of abstract conversation and perfect response based on the subjective and objective dialectical formalism, which is the nature of a conversation having concrete determinations of address, and its axiomatics, such time and place, which is confirmed by a notion I would call exploration, or developing a conversation -

II. Dialectical Knowledge Steps

Thesis and anti-thesis - the inter-conscious unity then gauges - the integrated method on the phone - its description -

The phone is on education, and psychoanalytic laws, even dialectical formalism which then is about the a priori being a posteriori when concrete universal like a film.

III. Steps -

- I. Inquiry into the person and his or her level of knowledge, or concretion in life - which means to introduce grading on education (A or A +) which then is a judgement on union between M U F, as here strong - it creates the following psychoanalytic graph

Voice _____ Phenomenon _____ Production of a Psychoanalytic Theory
of Infinite production of Concepts.
